## STRESSERASER RESEARCH BIBLIOGRAPHY

### Heart Rate Variability & Stress

Heart rate variability: Stress and psychiatric conditions. Berntson, G. G. & Cacioppo, J. T. In Malik, M. & Camm, A. J. *Dynamic Electrocardiography*. (2004) (pp. 57-64) New York: Blackwell/Futura.

Effects of short-term psychological stress on the time and frequency domains of heart-rate variability. Delaney, J.P., & Brodie, D.A. *Perceptual & Motor Skills*, (2000) 91, 515-24.

Autonomic, neuroendocrine, and immune responses to psychological stress: The reactivity hypothesis. Cacioppo, J. T., Berntson, G. G., Malarkey, W. B., Kiecolt-Glaser, J. K., Sheridan, J. F., Poehlmann, K. M., Burleson, M. H., Ernst, J. M., Hawkley, L. C., Glaser, R. *Annals of the New York Academy of Sciences*, (1998) 840, 664-673.

### Measurement of Parasympathetic Tone & Vagal Activity

Assessment of parasympathetic control of heart rate by a noninvasive method. Fouad FM, et al., *American Journal of Physiology*, (1984) 246:H838-H842.

A linear scale for measuring vagal tone in man. Julu PO, *Journal of Autonomic Pharmacology*, (1992) 12(2): 109-115.

Respiratory sinus arrhythmia: noninvasive measure of parasympathetic cardiac control. Katona Peter, et al., *Journal of Applied Physiology*, (1975) 39(5): 801-805.

Human sinus arrhythmia as an index of vagal cardiac outflow. Eckberg D., *Journal of Applied Physiology*, (1983) 54(4): 961-966.

The polyvagal perspective. Porges, S.W., *Biological Physiology*, (2007), 74, 15-26.

### Proper Breathing & Parasympathetic/Vagal Activity

The effect of carbon dioxide, respiratory rate and tidal volume on human heart rate variability. Poyhonen M, et al., *ACTA Anaesthesiologica Scandinavica*, (2004) 48: 93-101.

Effect of respiration rate on short-term heart rate variability. Schipke J.D., et al., *Journal of Clinical Basic Cardiology*, (1999) 2: 92.

Relative timing of inspiration and expiration affects respiratory sinus arrhythmia. Strauss-Blasche, Moser M, et al., *Clinical and Experimental Pharmacology and Physiology*, (2000) 27: 601-606.

Respiration And Heart Rate Variability: A Review with Special Reference to its Application In Aerospace Medicine. Tripathi Lt. Col. KK, *Indian Journal of Aerospace Medicine*, (2004) 48(1): 64-75

Slow breathing reduces chemoreflex response to hypoxia and hypercapnia, and increases baroreflex sensitivity. Bernardi L, Gabutti A, Porta C, Spicuzza L., *Journal of Hypertension*, (2001) 19(12):2221-9.

Phase relationship between normal human respiration and baroreflex responsiveness. Eckberg DL, et al., *Journal of Physiology*, (1980) 304: 489-502.

### **Heart Rate Variability Biofeedback**

Biofeedback treatment increases heart rate variability in patients with known coronary artery disease. Del Pozo, J. M., R. N. Gevirtz, et al. *American Heart Journal*, (2004) 147(3).

Combined heart rate variability and pulse oximetry biofeedback for chronic obstructive pulmonary disease: preliminary findings. Giardino, N. D., L. Chan, et al. *Applied Psychophysiology & Biofeedback*, (2004) 29(2): 121-33.

Heart rate variability biofeedback as a behavioral neurocardiac intervention to enhance vagal heart rate control. Nolan, R. P., M. V. Kamath, et al. *American Heart Journal*, (2005) 149(6).

Heart Rate Variability Biofeedback Increases Baroreflex Gain and Peak Expiratory Flow. Lehrer, P. M., Vaschillo, E., Vaschillo, B., Lu, S.-E., Eckberg, D. L., Edelberg, R., et al. *Psychosomatic Medicine*, (2003) 65(5), 796-805.

Slow breathing increases arterial baroreflex sensitivity in patients with chronic heart failure. Bernardi L, Porta C, Spicuzza L, et al. *Circulation*, (2002) 105: 143-145

Resonant frequency biofeedback training to increase cardiac variability: rationale and manual for training. Lehrer PM, Vaschillo E, & Vaschillo B. *Appl Psychophysiol Biofeed*, (2000) 25: 177-191.

### **Other**

Heart rate variability from short electrocardiographic recordings predicts mortality from all causes in middle-aged and elderly men. Dekker, J.M., Schouten, E.G., Looftwijk, P., Pool, J., Swenne, C.A., & Kromhout, D. The Zutphen study. *American Journal of Epidemiology*, (1997) 145, 899-908.

The role of vagal function in the risk for cardiovascular disease and mortality. J.F. Thayer, R.D. Lane, *Biological Physiology* (2007), 74, 224-242.

Analysis of the heart rate variability in negative functional states in the course of psychological relaxation sessions. Mashin, V., & Mashina, M. *Human Physiology*, (2000) 26(4), 420-425.

Anxiety and hostility are associated with reduced baroreflex sensitivity and increased beat-to-beat blood pressure variability. Virtanen R. et al. *Psychosom Med*, (2003) 65(5):751-6.

Heart rate variability in depressive and anxiety disorders. Gorman, J. M. & Sloan, R.P. *American Heart Journal*, (2000) 140(4 Suppl): 77-83.

The effects of stress-anxiety and coping styles on heart rate variability. Fuller, B. F.. *International Journal of Psychophysiology*, (1992) 12(1): 81-6.

Autonomic dysregulation in panic disorder and in post-traumatic stress disorder: application of power spectrum analysis of heart rate variability at rest and in response to recollection of trauma or panic attacks. Cohen, H., J. Benjamin, et al. *Psychiatry Research*, (2000) 96(1): 1-13.

Heart rate variability in insomniacs and matched normal sleepers. Bonnet, M. H., & Arand, D. *Psychosomatic Medicine*, (1998) 60(5), 610-615.
